

How to download videos to an iPad for offline use...

1. Click the links provided to take you to the video on Vimeo
2. Click the Download button

3. At the top of your iPad screen click the save button

4. You'll need to then save the video to a third-party app like Dropbox
5. Go in to the app (eg Dropbox) and select the video you've downloaded and ensure the settings say that it is available offline.
(In Dropbox this is done by clicking the three dots after the video file name and clicking on 'Make Available Offline')
6. To access this video later, return to the third-party app (eg Dropbox) and find your downloaded video
